Strategic Planning

Health Functional Proponent

“Assigned primary responsibility for the business process supported by a given information system or initiative.”

Military Health Information Management

- **Begins With Senior Leadership and Functional owners defining the core business processes**
- **Serves as a blueprint to improve, reengineer, and integrate Health Care best business practices**
  - **Military Health Business Processes**
  - **Systems Supporting Business Processes**
  - **Rules and Standards Governing eBusiness Systems and Operations**
- **Represents essential building blocks of the business in accordance with business requirements, processes, information exchanges, and data.**

Information Management Provides a Framework

…that details Military Health business processes and requirements…to…

…focus on the individual service member

…ensure sophisticated medical treatment forward in the theater supported with a rapid evacuation system

…ensure a healthy force prior to deployment

…provide combat health support
